Enjoy complimentary electrical inclusions
for your new Marque home

MARQUE®

Complimentary Electrical Inclusions

The following electrical substitutes to gas are available at no extra charge.

Electric Induction Cooktop

Combining sleek aesthetics with powerful cooking, this cooktop is an energy-efficient alternative to gas. It provides instant heat, stays cool to touch for safety (especially with children), and is easily cleaned with a simple wipe.

Electric Inbuilt Fireplace

Showcasing a flawless panoramic view with edge-to-edge glass, driftwood or pebble sets, and 8 ambient lighting themes. Requires no gas or flue, making it a hassle-free and visually appealing addition to any space.

Electric Heat-Pump Hot Water System

Efficiently transferring heat from the air outside to the water in the tank, this system is an eco-friendly way to heat your home's water. Similar to solar hot-water systems, it's a wise long-term investment that saves energy and money.

All-Electric Ducted Heating & Cooling

Featuring an energy-smart design, this system offers a seamless reverse-cycle operation. Different from in-wall or split systems, it provides comprehensive ducted heating and cooling through ceiling ducts, mimicking traditional gas-ducted systems.
